Address: Bucharest

SUMMARY
Junior front-end developer with experience in HTML, CSS, SCSS, Tailwind CSS, Bootstrap, Styled-components, JavaScript, Cypress, Angular, Ionic, SQLite, React Js, Context API, Redux, Next Js, Node js (Express), and MySQL.
Passionate about using technology to build innovative solutions that enhance user experiences.

SKILLS
- HTML5, CSS3, SCSS, Bootstrap 4, Tailwind CSS
- JavaScript, React Js, Next Js, Styled Components, Jest Test Framework, Cypress Test Framework, Postman
- Angular, Ionic, SQLite, Node js (Express), MySQL

EXPERIENCE

Aug 2022 – Present: Junior developer – InfoWorld

During my work at the company, I developed a range of skills that are essential for web and mobile development. I gained hands-on experience in HTML, CSS, and JavaScript coding, as well as using the Ionic Framework for building hybrid mobile applications that can run on multiple platforms. I also learned how to use SCSS for writing maintainable and modular styles that follow the best practices of CSS architecture. Moreover, I improved my code quality and readability by using TypeScript, a superset of JavaScript that adds static typing and catches errors at compile time. Furthermore, I used Angular, a popular framework for building complex web applications with a component-based architecture and data binding. Finally, I worked with Node Express, a fast and minimalist web framework for Node.js, and SQLite, a lightweight and embedded SQL database engine that can handle large datasets efficiently.

Aug 2021 - Jun 2022: Junior developer – GEOCAD IT SOLUTIONS SRL · Freelance

As a web developer, I have experience in designing and implementing HTML templates for various projects. I have also used JavaScript to create and manipulate DOM elements dynamically and interactively. To ensure the quality and functionality of my code, I have performed testing with Cypress, a reliable and user-friendly tool for end-to-end testing.

Moreover, I have leveraged the power of Scss and Bootstrap to enhance the design and responsiveness of my web pages, making them more attractive and user-friendly.

Aug 2020 - Sep 2021: Apprenticeship – Poetii Inchisorilor
Volunteered for open-source project focused on HTML, CSS, and JavaScript development
Introduced new CSS concepts like modules and variables
Currently working on a version of the project using Next.js

LANGUAGES
English - Very good
French - Medium

PROJECTS

http://167.86.87.179:4200/client/#/

Admin panel virtual warehouse.

A user has an administration panel of a virtual warehouse, where he adds products, views them, modifies them as needed or transfers them to another store.

Tools I used for this:

Angular , ngx-barcode, rxjs, tailwindcss, typescript,chart js, cors, dotenv, express, joi, jsonwebtoken, md5, morgan, nodemon, sqlite3

https://firmecadastru.ro/

I leveraged the power of Bootstrap 4 and Vanilla JavaScript, coupled with the popular jQuery library, to create a sleek and modern frontend that is both intuitive and visually appealing. My expert knowledge of these technologies allowed me to build a responsive and dynamic user interface that engages users and delivers an exceptional user experience. Whether you're looking for a developer with expertise in frontend development or a keen eye for design, my experience with Bootstrap 4 and Vanilla JavaScript makes me the ideal candidate for your next project.

https://dornescu.ro/

I designed and built my personal website from scratch using just Vanilla JavaScript and advanced CSS techniques, including SASS. The result is a visually stunning and highly responsive site that showcases my skills as a front-end developer. Using my knowledge of JavaScript, I was able to implement a range of dynamic features and animations, while my proficiency in CSS allowed me to craft a unique and memorable user experience. Whether you're a prospective employer or simply interested in learning more about me, my personal website is a true reflection of my passion for web development.

https://electronic-store-next-js.vercel.app/

I developed as an exercise an e-commerce simulation website using cutting-edge technologies including Next.js, Node.js with Express, and MySQL. The site features dynamic pages, advanced routing, and state management using the API Context, allowing for a

seamless and responsive user experience. The use of Fetch to access the Node.js API ensures fast and reliable data retrieval, making this site a standout example of modern web development.

https://ionic-lecommerce.web.app/login

I created as an exercise an engaging e-commerce simulation website using Angular with Ionic. The site boasts a user-friendly interface and a wide range of products that are easy to browse and purchase. Leveraging the power of Angular and Ionic, I implemented advanced features such as seamless navigation and responsive design, resulting in a highly polished and professional-looking site that is sure to impress visitors.
